PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building visually appealing, highly interactive, and scalable web applications using React.js, Next.js, and modern JavaScript/TypeScript. Proven ability to translate UI/UX designs into responsive, pixel-perfect interfaces that deliver seamless user experiences. Strong background in component-driven architecture, reusable UI systems, REST and GraphQL integrations, and performance optimization. Experienced in collaborating closely with designers, backend engineers, and product teams in fast-paced startup and enterprise environments, while taking ownership of features from concept through successful production release.

CORE TECHNICAL EXPERTISE

Full Stack Development

JavaScript & TypeScript (3+ years professional experience), Angular, Node.js & NestJS backend development, Next.js & React.js modern front-end applications, RESTful & GraphQL API design and optimization, React Native cross-platform mobile development, Docker containerization, Payment integrations

Database & Architecture

PostgreSQL: Schema design, query optimization, migrations, integration, Software architecture and design patterns implementation, Microservices architecture and scalable system design, Performance optimization and security best practices

Development Practices

Git workflows, CI/CD, and modern software development practices, Unit testing, integration testing, and end-to-end testing, reviews, peer programming, and technical mentorship, Code reviews, peer programming, and technical mentorship, Agile methodologies and cross-functional team collaboration

Cloud Technologies

Cloud technologies including AWS (IAM, S3, Lambda, CloudWatch), Azure (App Services, Functions, DevOps), and Firebase (Realtime Database, Authentication, Hosting) for scalable backend infrastructure, serverless architecture, and deployment automation.

PROFESSIONAL EXPERIENCE

DevOps upskilling program Amalitech

AmaliTech

Sept 2025 – Dec2025

Kigali, Rwand

- Explored Infrastructure as Code with Terraform:** Introduced to Terraform basics, writing simple configuration files to provision and manage AWS resources as part of the upskilling program.
- Hands-on with Core AWS Services:** Gained beginner-level exposure to key AWS services including EC2, S3, IAM, and CloudWatch – learning how they work together in a cloud environment.
- CI/CD with Jenkins and GitHub:** Learned the basics of setting up a Jenkins pipeline and using GitHub for version control and triggering automated workflows.

Software Developer– Angular/NestJs

AmaliTech

July 2025 – Present

Kigali, Rwand

- Worked on AmaliTech Procurement Manager (Microservices Architecture):** Contributed to front-end development of a high-impact enterprise application using Angular and NestJs and RESTful APIs. Built responsive, accessible, and performant UIs aligned with modern microservices principles and scalable architecture.
- Integrated & Consumed GraphQL and REST APIs:** Collaborated with backend teams to design, consume, and optimize GraphQL and RESTful APIs for dynamic and scalable data fetching. Improved application performance and user experience across complex Angular and React interfaces.
- Led Cross-Functional Collaboration:** Collaborated closely with Product Managers, Designers, and QA Engineers to ship new features and enhancements, ensuring timely delivery and quality standards through effective communication and technical expertise.

Angular Front End developer – Angular/NestJs

Amalitech Graduate Training Program

June 2024 – Jan 2025

Kigali, Rwand

- Built **SkillSpace** Capstone Platform: Developed a full-stack career advancement platform using Angular and REST APIs, applying SDLC practices, modular architecture, and SOLID principles. Collaborated in cross-functional teams to design responsive UI components, integrate backend services, and ensure high code quality through testing and version control
- Established Best Practices & Code Standards:** Instituted professional implementation patterns, conducted code reviews, and mentored peers in clean architecture and problem-solving approaches to elevate overall code quality in React Native development.
- Enhanced Web Application Delivery:** Collaborated with cross-functional teams using Agile methodology to translate technical insights into improved web architecture, UX, and functionality. Drove collaborative problem-solving and implemented optimized React and TypeScript solutions for scalable, high-quality applications

EDUCATION

Bachelor of Science in Computer Engineering (Honours)

University Of Rwanda

March 2021 – March 2024

Certifications

Certified React Developer

Certified Angular Developer

Certified AWS Cloud Practitioner

Language

English: Professional Working Proficiency

Kinyarwanda: Native Fluency

Interests

Business Knowledge

Reading books

Learning new technologies
